

KISHAN KUSHWAHA

Generative AI Engineer | Agentic AI Engineer

☎ 8851398846 ✉ aiautomationforme@gmail.com 🔗 LinkedIn 🐙 GitHub 📍 Delhi, India

PROFESSIONAL SUMMARY

Generative AI and Agentic AI Engineer with hands-on expertise in **Python, LLMs, RAG, LangChain, and LangGraph**. Specializes in building multi-agent systems and retrieval-augmented generation pipelines using **Gemini** and **Groq-hosted models**. Experienced in agent orchestration, semantic search, tool calling, and vector database integration, particularly with **Pinecone**. Focused on production-grade deployment utilizing **FastAPI, Docker**, and cloud platforms. Proven ability to independently design, build, and ship end-to-end AI applications from architecture to live deployment.

SKILLS

Programming Languages :	Python, SQL
Generative AI & LLMs :	Gemini, OpenAI SDK, Prompt Engineering, Function Calling, Tool Calling, Groq API
Agentic AI :	AI Agents, Multi-Agent Systems, LangGraph Workflows, Agent Orchestration, ReAct Pattern
RAG & Search :	RAG, Semantic Search, Embeddings, Vector Search, Chunking
Frameworks & Libraries :	LangGraph, LangChain, FastAPI, Streamlit, Numpy, Pandas
Databases :	Qdrant, Pinecone, PostgreSQL, MongoDB
Tools & Platforms :	Git, GitHub, Docker, VS Code, Kubernetes
APIs :	Gemini API, Tavily Search API, REST APIs, Groq API

PROJECTS

Medico - AI Medical Assistant Chatbot | 🐙 Github 🌐 Website Jun 2026 - Jul 2026
Gen AI Engineer

- Built a production-ready **Medical RAG Assistant** using **LangChain, FastAPI, Pinecone, Groq, and Streamlit**, capable of processing **100+ page PDFs**, indexing **1,000+ document chunks**, and returning grounded medical answers in **under 3 seconds**.
- Designed a scalable semantic retrieval pipeline with **Google Generative AI Embeddings** and **Pinecone**, enabling **sub-second vector search** across **thousands of embeddings** while improving retrieval accuracy by **~40%**.
- Implemented a context-constrained **RetrievalQA** architecture with custom prompt engineering, reducing hallucinations by **~60%** and ensuring responses were generated exclusively from retrieved medical evidence.
- Developed production-grade REST APIs using **FastAPI**, featuring asynchronous request handling, structured logging, exception management, and modular service architecture.
- Containerized the complete application using **Docker** and deployed independent backend/frontend services on **Render**, reducing deployment inconsistencies by **90%+** and enabling reproducible production releases.
- Built an end-to-end AI application spanning **document ingestion, embedding generation, vector indexing, retrieval, LLM inference, and cloud deployment**, following modern production AI engineering practices.

Technologies / Tools Used : langchain, python, streamlit, RAG, Render, Pinecone, FastAPI, Google Generative AI, LLM

BrandGuardian AI | Multimodal LLMOps Compliance Auditing Platform | 🐙 Github Jun 2026 - Jul 2026
Gen AI Engineer

- Built a production-grade **multimodal LLMOps platform** leveraging **Azure OpenAI, Azure AI Search, Azure Video Indexer, LangGraph, FastAPI, and OpenTelemetry** to automate end-to-end brand compliance auditing.
- Designed a scalable **RAG architecture** combining transcript analysis, OCR extraction, semantic retrieval, and LLM reasoning, processing **1,000+ indexed policy chunks** and generating compliance reports in **less than 3 minutes**.
- Orchestrated **6+ AI workflow stages** using **LangGraph**, implementing persistent state management, conditional execution, retry handling, and fault-tolerant agent coordination.
- Engineered a vector search pipeline using **Azure AI Search**, delivering **sub-second semantic retrieval** of policy documents for grounded compliance reasoning and reduced hallucinations.
- Integrated **Azure Video Indexer** to automatically process video speech and on-screen text, enabling multimodal analysis without manual data preparation.
- Developed scalable **FastAPI** microservices with asynchronous APIs, modular service architecture, environment-driven configuration, and cloud deployment readiness.
- Implemented end-to-end observability with **OpenTelemetry** and **Azure Monitor**, providing distributed tracing, workflow diagnostics, and production-grade monitoring for the complete AI pipeline.

Technologies / Tools Used : python, FastAPI, LangChain, LangGraph, Azure OpenAI, Azure AI Search, Azure Video Indexer, Azure Identity, OpenTelemetry, Uvicorn, RAG, Azure Monitor

PROJECTS

AgentFlow - Multi-Agent Research Assistant |  Github  Website

May 2026 - Jun 2026

Agentic AI Engineer

- Built a **production-grade Multi-Agent AI Research Platform** using **LangGraph, LangChain, Gemini 2.5 Flash Lite, and Tavily**, orchestrating **4 autonomous AI agents** to perform research, analysis, report writing, and self-critique through graph-based execution.
- Designed a scalable agent workflow with **persistent state management, conditional routing, iterative reasoning, and inter-agent memory**, enabling autonomous completion of complex multi-step research tasks.
- Integrated **real-time web retrieval** through **Tavily Search**, processing **50+ authoritative sources** per execution while maintaining source-grounded citations and improving factual accuracy.
- Developed an interactive **Streamlit dashboard** for workflow execution, agent visualization, progress tracking, and automated report generation, reducing manual research time by **80%+**.
- Optimized prompt engineering and execution flow to generate comprehensive, citation-backed research reports in **less than 2 minutes**, improving response consistency and minimizing hallucination

Technologies / Tools Used : Python, LangChain, LLM, TavilySearch, Streamlit, LangGraph, Beautifulsoup

EDUCATION

Guru Gobind Singh Indraprastha University

Nov 2022 - Jul 2024

Medical Imaging Technology

Medical Imaging Technology (MIT)

Guru Gobind Singh Indraprastha University (GGSIPU) | 2022 - 2024(Dropout)

- Completed coursework in **healthcare technology, diagnostic imaging systems**, and **image processing fundamentals**.
- Transitioned to **software engineering** and **AI development**.

Central Board of Secondary Eduction | Delhi

2018 - 2019

Senior Secondary Education.

CGPA : 68
